TO WHOMSOEVER IT MAY CONCERN

This is to certify that, we at BJMC-JHU CRS Lab, Pune have been using the product Biomlife™ by Ruhvenile Biomedical for our microbiome study.

We have used the product for stool sample collection from participants enrolled in our study and are satisfied with its performance and DNA yield. As the study is ongoing, we will be able to evaluate the effects of long-term storage of stool samples in this buffer.

We are more than pleased with the efficient and attentive customer service and recommend this product for other companies/institutions working in this domain

We wish them good luck for more innovations in this regard.
